

WELCOME

Welcome to **Blue Oval Truck Parts!**

Thank you for requesting a catalog from BOTP. We are really excited about our new catalog and hope you are as well. With many years of automotive experience, we at Blue Oval know what it takes to provide you the **service** and **quality** you deserve when building/restoring your Ford truck.

Although we understand many of our customers prefer a print catalog, Blue Oval has invested a lot of time and resources in building a Premiere website.

We realized that what was going to set us apart from the competition, besides an easy to use catalog, excellent customer **service**, and the **quality** and selection of the parts offered, was the development and continued ongoing improvement of a functional and easy to use website.

Log on to **www.blueovaltruckparts.com** and experience the best: **Selection** – browse over 5,000 products on-line many of which have pictures and more detailed descriptions than our print catalog, **Service** – Orders filled within 7 business days, **Prices** - competitive pricing, **Quality** – 100% hassle free money back guarantee within 15 days of purchase, as well as, **On-line only Product Specials, Project Build-Ups, Truck of the Month, Truck Talk, Photo Gallery, Event Schedule, and Tech/Feature Articles.**

All of us here at BOTP look forward to providing you with the **service** and **quality** you deserve. Our goal is to become your one stop shop, **Ford Truck Enthusiast Print & Online Community.** We welcome any comments, questions, corrections, and or feedback you may have and take pleasure in being of **service** to you.

Regards,

Blue Oval Truck Parts is the Answer, What's the Question?

SIGNIFICANT HIGHLIGHTS IN FORD TRUCK HISTORY

1948 – Model designations changed to F1, F2, F3, and F4

1953 – 50th Anniversary of Ford – horn button installed on all vehicles

1953 – Model designations changed to F100, F250, and F350

1954 – Y-block V8 introduced

1956 – Wraparound widow introduced

1957 – Pickups totally restyled – Styleside (Fleetside) bed introduced with steel bed

1958 – Quad headlights introduced

1959 – Sound deadener, Custom Cab, and 4X4 introduced

1963 – 6 cylinders 262 CID now available

1964 – F100 available in 6.5ft and 8ft bed in both Stepside and Styleside models

1965 – Twin I-Beam introduced

1966 – Ranger option introduced

1967 – Pickups redesigned for a more squared off look

1968 – Side marker lights and reflectors added to comply with Federal regulations

1970 – Ranger XLT introduced as top of the line trim package

1972 – Power brakes now optional on 4X4's

1974 – Super Cab introduced

1975 – F150 introduced with a GVW of 6,000lbs

1981 – Compact Ranger introduced in January of 1981

1982 – Ford “Oval” introduced

1983 – Regained #1 spot in truck sales

1984 – The F100 was discontinued and replaced by the Ranger

1987 – New aerodynamic body Styling was introduced

1992 – A 75th Anniversary F-150 was offered

1996 – Last year the Bronco was produced

VEHICLE IDENTIFICATION

1948 - 1951

WHERE TO FIND YOUR VIN

For 1948-9/51 the VIN is stamped on the clutch housing and can be seen when the transmission cover is removed. After 9/15/91, the VIN is located on the glove box door rating plate and on the left side of the frame near the steering gear mounting bracket. The first four digits of the VIN number indicate year, series and number of cylinders. The last six digits indicate the production sequence.

Vehicle Identification Number – 98RY137125 (example only)

SERIES PREFIX:

F1 = 1/2 Ton
F2 = 3/4 Ton
F3 = 3/4 Ton Heavy Duty
F4 = 1Ton

MODEL YEAR

8 = 1948
9 = 1949
0 = 1950
1 = 1951

2BC Carburetor

MODELS LINE

C = 1/2 Ton Pickup
Y = 3/4 Ton Pickup
T = 1 Ton Pickup

Production Sequence (series #)

KEY INFORMATION

1948: The 1948 trucks featured wider, longer, and taller cabs. Models were changed with 7-ton trucks becoming known as F1's and 7-ton as F2's. Production totals not available.

1949: The most recognizable change on the 1949 was the deletion of the red pinstripes on the silver painted grille bars. Also, wheels were no longer black but were painted to match the body color. Production total combined with 1950. See 1950.

1950: For the most part, the only change made on the F-1 was the relocation of the standard three-speed shift lever from the floor to the steering column. Production total: F1's – 148,956 and F2's – 21,464.

1951: In 1951's door panels were added to accent the interior of the cab and a larger rear window was added for better visibility. The pickup bed was redesigned using a hardwood floor instead of a metal floor. The tailgate and front bumper were also redesigned. For those trucks equipped with a V8, an emblem was placed on the upper grille support. During the model year the grille was changed from the restyled single bar type argent (silver) grille that was introduced at the beginning of the year to an ivory painted grille with argent (silver) headlight rings. The hood got new side spears and a three-slot embellishment at the front. Production totals: F1's – 117,414, F2's – 17,485, F3's – 19,848, and F4's – N/A.

1952

WHERE TO FIND YOUR VIN

For 1952 the VIN is located on the glove box door rating plate and on the left side of the frame near the steering gear mounting bracket. The VIN number identifies the series,

model year, assembly plant, and production sequence.

Production Sequence (series #)

KEY INFORMATION

1952: Most changes on the 1952's were cosmetic and exterior only. Affixed to the upper grille support panel was once again the Ford insignia. Models with V8 engines had an emblem located in the center of the hood vent. A round emblem indicating the trucks model designation was added to the side of the hood. The front grille and hood trim were painted white. One noticeable thing missing from the front-end of the cab, were the front fender braces. Production totals: F1's – 81,537, F2's – 15,136, F3's – 15,771, and F4's – N/A.

1953-56

WHERE TO FIND YOUR VIN

For 1953-56 the VIN is located on the glove box door rating plate and on the left side of the frame near the steering gear mounting bracket. The VIN number identifies the series, engine, model year, assembly plant, and production sequence.

Production Sequence (series #)

KEY INFORMATION

1953: 1953 was Ford Motor Company's 50th Anniversary so all trucks were equipped with a 50th Anniversary horn button. Also introduced was the Ford truck crest located on the front of the hood. Production totals: F100's – 116,437, F250's – 23,363, and F350's – 7,757.

1954: Not many styling changes were made on the 1954s except for the somewhat visible grille design. However, the biggest change was in the engine compartment where the standard Cost Clipper 6 cylinder bored to 223ci could now be upgraded to a new V8 known as the Y-block. Production totals: F100's – 101,202, F250's – 20,669, and F350's – 4,482.

1955: A new V-type white painted grille was added to the 1955. For the first time, parking lamps and hood side medallions appeared. The wheels on the F-100s were painted Snowshoe White. Two-tone paint was optional for the exterior paint. Production totals: F100's – 124,842, F250's – 23,505, and F350's – 5,450.

1956: Recessed headlamps, a wraparound rear window, and a new grille were new for 1956. Trucks equipped with automatic transmission came with the Ford-O-Matic script. Production totals: F100's – 137,581 (6.5ft bed) and 25,122 (8ft bed), F250's – 28,341, and F350's – 6,226.

1957-60

HERE TO FIND YOUR VIN

For 1957-58 the VIN plate is attached to the rear face of the driver's door. The VIN number identifies the series, engine, model year, assembly plant, and production sequence.

Production Sequence (series #)

KEY INFORMATION

1957: The 1957 trucks were completely redesigned. The most recognizable change was the Styleside (Fleetside) pickup bed. The sides of the pickup bed ran parallel to the redesigned cab of the truck unlike the traditional Stepside (Fleareside) pickup which had fenders attached to the outside of the box. The Stepside (Fleareside) pickups came with a wood floor and the Styleside (Fleetside) came with steel floor. Additional changes were that the running boards were eliminated and the dash was given a new design. Production totals: F100's – 13,122 (Fleareside), 64,050 (Styleside), 2,319 (Longbed Fleareside), and 20,114 (Longbed Styleside), F250's – 4,321 (Fleareside) and 10,936 (Styleside) and F350's – 1,869 (Styleside).

1958: The 1958 trucks were given a few minor changes. The most recognizable changes were the quad-headlights, hood side emblems, and restyled mesh type grille. Production totals: F100's – 11,818 (Fleareside), 56,454 (Styleside), 1,833 (Longbed Fleareside) and 20,928 (Longbed Styleside), F250's – 3,155 (Fleareside) and 10,555 (Styleside), and F350's – 994 (Fleareside) and 1,974 (Styleside).

WHERE TO FIND YOUR VIN

Production Sequence (series #)

KEY INFORMATION

1959: Most of the styling changes on the 1959 trucks consisted of improvements to the interior including woven nylon saran seat upholstery, foam rubber seat padding, sound deadening material, two-tone paint on the doors and the instrument panel, a left door armrest, a white steering wheel with a chrome horn ring, a passenger's side visor, and an illuminated cigar lighter. Exterior changes included a chrome grille, headlight bezels, parking light rims, windshield moldings, and matching door locks. A Custom Cab emblem was added to each door. Production totals: F100's - 26,616 (Flareside) and 112,082 (Styleside), F250's - 4,827 (Flareside) and 16,491 (Styleside), and F350's - 4,827 (Flareside) and 16,491 (Styleside).

1960: The 1960 trucks showcased a new grille with integrated quad headlight bezels. The hood was redesigned and new side emblems were added. Several minor improvements appeared, including a redesigned armrest, modified door latches, new door weather stripping, a redesigned wiring harness, and a cowl side fuse and circuit breaker box. Production totals: F100's - 27,383 (Flareside), 113,875 (Styleside), 964 (Flareside 4X4) and 4,334 (Styleside 4X4), F250's - 6,356 (Flareside), 15,518 (Styleside), 828 (Flareside 4X4) and 1,806 (Styleside 4X4), and F350's - 1,213 (Flareside) and 2,140 (Styleside).

1961-66

WHERE TO FIND YOUR VIN

For 1961-66 the VIN plate is attached to the rear face of the driver's side door. The information on the rating plate is the VIN number, the wheel base in inches, color, model type, body type, transmission type, rear axle, maximum gross vehicle weight in pounds, certified net horsepower and domestic special order (DSO) numbers.

Consecutive Unit Number (series #)

KEY INFORMATION

1961: The 1961 trucks were restyled with less front overhang, additional curved lines, a flatter hood, and larger glass area on cab. Production totals: F100's - 21,474 (Flareside), 3,361 (Styleside), 2,468 (Flareside 4X4), and 255 (Styleside 4X4), F250's - 10,008 (Unibody), 149 (Styleside 4X4), 4,426 (Flareside), and 1,671 (Flareside 4X4), and F350's - 947 (Flareside) and 1,191 (Styleside).

1962: The 1962 trucks were virtually unchanged. One of the major changes was the relocation of the Ford lettering to the grille opening. As on previous models the custom cab option was available on all models. It consisted of woven upholstery, chrome trim on the instrument cluster, white steering wheel, two-tone interior, bright metal grille and windshield reveal moldings. Production totals: F100's - 68,983 (Unibody), 29,934 (Flareside), and 24,610 (Styleside), F250's - 10,703 (Styleside Unibody), 7,247 (Flareside) and 6,002 (Styleside), and F350's - 1,216 (Flareside) and 1,503 (Styleside).

1963: For 1963, the 6 cylinder 262 CID became available. Also new were a rectangular grille pattern and hood side emblems. Production totals: F100's - 40,535 (Unibody), 35,963 (Flareside), 76,728 (Styleside), 967 (Flareside 4X4) and 2,809 (Styleside 4X4), F250's - 5,456 (Unibody), 6,673 (Flareside), 14,159 (Styleside), 865 (Flareside 4X4), and 1,835 (Styleside 4X4) and F350's - 1,240 (Flareside) and 1,470 (Styleside).

1964: For 1964, the F-100 Stepside or Styleside was available with either 6-1/2 foot or 8-foot pickup bed. The F-100 Styleside got a double wall bed with a single handle tailgate latch. Production totals: F100's - 28,876 (Flareside), 152,272 (Styleside), 802 (Flareside 4X4), 2,922 (Styleside 4X4), F250's - 7,621 (Flareside), 28,104 (Styleside), 1,028 (Flareside 4X4), and 2,232 (Styleside 4X4), and F350's - 1,388 (Flareside) and 1,714 (Styleside).

1965: In 1965, the twin I-beam suspension was added. It combined the strength of a solid front axle with the softer ride of an independent front suspension. The parking lights were moved above the headlights. Production totals: F100's - 34,184 (Flareside) and 178,581 (Styleside), F250's - 7,500 (Flareside) and 42,044 (Styleside), and F350's - 2,085 (Flareside) and 1,934 (Styleside).

1966: In 1966 a new grille was added that featured a horizontal bar and twin spear shaped openings above two rows of small rectangular cutouts. A new Deluxe Ranger option was introduced and was identified with the Ranger emblem. Production totals:

F100's - 27,330 (Flareside), and 228,990 (Styleside), F250's - 6,699 (Flareside), 58,489 (Styleside), 1,595 (Flareside 4X4), and 3,559 (Styleside 4X4), and F350's - 3,928 (Flareside) and 2,605 (Styleside)

WHERE TO FIND YOUR VIN

For 1967-72 the VIN plate is located on the right side of the cowl top panel under the hood. The information on the rating plate is the VIN number, wheel base in inches, color, model type, body type, transmission type, rear axle, maximum gross vehicle weight in pounds, certified net horsepower and Domestic Special Orders (DSO) numbers.

Consecutive Unit Number (series #)

KEY INFORMATION

1967: In 1967, the F-Series trucks were redesigned to feature a squared-off look. The headlights were reworked into the rectangular grille with the parking lamps located just under the headlights. The interior increased in size and had more glass. Production totals: F100's - 18,307 (Flareside), 204,710 (Styleside), 481 (Flareside 4X4) and 3,455 (Styleside 4X4), F250's - 4,412 (Flareside), 58,506 (Styleside), 915 (Flareside 4X4), and 3,836 (Styleside 4X4), and F350's - 1,411 (Flareside).

1968: For 1968, side marker and reflectors were added to comply with federal regulations. The grille, once again got a new look. The interior was improved the armrests and the heater controls redesigned. Production totals: F100's - 16,686 (Flareside) and 285,015 (Styleside), F250's - 5,298 (Flareside) and 90,170 (Styleside), and F350's - 1,612 (Flareside).

1969: In 1969 the grille style remained the same but the color changed from black to white to chrome all within the same year.

The rear view mirror was now mounted on the windshield instead of the window frame. Production totals: F100's - 16,248 (Flareside), 315,979 (Styleside), 465 (Flareside 4X4), and 7,940 (Styleside 4X4), and F350's - 1,829 (Flareside).

1970: In 1970, the grille got a new grid pattern design. Wraparound parking lights were used and the rear side markers were moved. The trim packages changed names - Standard became Customs and Customs became Sport Custom Cab. Ranger XLT was introduced as the top of the line optional trim package. Production totals: F100's - 13,551 (Flareside), F250's - 4,683 (Flareside) and 121,265 (Styleside), and F350's - 1,570 (Flareside).

1971: The grille changed again to six rectangular sections on each side of the center vertical bar. A new two-spoke steering wheel was introduced with a horn bar instead of the button. Passenger car style hubcaps were used on the F-Series trucks. Production totals: F100's - 10,106 (Flareside), 332,131 (Styleside), 591 (Flareside 4X4), and 12,870 (Styleside 4X4), F250's - 2,684 (Flareside), 117,820 (Styleside), 635 (Flareside 4X4), and 16,164 (Styleside 4X4), and F350's - 1,349 (Flareside).

1972: The grill changed yet again to four rectangular sections on each side of the center vertical bar. Optional power brakes were offered on 4X4 trucks. Production totals: F100's - 3,034 (Flareside) and 457,746 (Styleside), F250's - 3,004 (Flareside) and 187,348 (Styleside), and F350's - 11,889 (Styleside).

KEY INFORMATION 1973-79

1973: For 1973 trucks, the F-Series were redesigned although the styling remained similar to the 1972 truck. The parking lights were moved above the headlights and the grille had rectangular slots divided by a vertical center bar. The side marker lights were located by a concave groove on the body side, which previously was a spear. Production

VEHICLE IDENTIFICATION

totals: F100's - 3,034 (Flareside and 457,746 (Styleside), F250's - 3,004 (Flareside) and 187,348 (Styleside), and F350's - 11,889 (Styleside).

1974: The Super-Cab was introduced in 1974 but no other exterior styling changes were made. Production totals: F100's - 2,517 (Flareside), 389,407 (Styleside), 17,537 (super Cab), 176 (Flareside 4X4), and 26,788 (Styleside 4X4), F250's - 1,787 (Flareside), 123,711 (Styleside), 10,852 (Super Cab), 645 (Flareside 4X4), and 34,618 (Styleside 4X4), and F350's - 1,340 (Super Cab) and 9,929 (Styleside).

1975: For 1975, the F-150 was introduced. A few interior changes were made, but no exterior styling changes were made. Packages available; Northland Special, Ranger and Ranger XL. Production totals: F100's - 173,965 (Cab), 16,792 (Super Cab), and 37,297 (Cab 4X4), F150's - 80,917 (cab) and 20,958 (Super Cab), F250's - 86,106 (Cab), 29,622 (Super Cab), and 47,266 (Cab 4X4), and F350's - 41,616 (Cab) and 2,816 (Super Cab).

1976: F-Series trucks received a new grille with the familiar split grille frame. Headlights were set in blacked out bezels and rectangular grille openings were larger. During the year clear parking lenses replaced amber parking lamp lenses. Production totals: F100's - 225,154, F150's - 200,174, F250's - 189,631, and F350's - 42,804.

1977: 1977 trucks were slightly different than 1976 models. Side nameplates were redesigned and the fuel filler door was now rectangular and flush with the body side. New hubcaps and wheel covers were added. Production totals: F100's - 197,822, F150's - 337,068, F250's - 180,612, and F350's - 62,493.

1978: New styling and grille design was added to F Series trucks. Production totals: F100's - 158,591, F150's - 422,264, F250's - 190,613, and F350's - 59,528.

1979: The biggest styling change for this year was standard rectangular headlights. Everything else was pretty similar to previous years. Production totals: F100's - 225,893, F150's - 400,399, F250's - 189,743, and F350's - 72,674.

1980: The most recognizable feature included a new vertical and horizontal bars theme grille. And the recessed parking light below the recessed headlights. The Ford letters on the hood were slanted back. Production totals: F100's - 133,590, F150's - 173,050, F250's - 71,089, and F350's - 49,339.

1980-86

WHERE TO FIND YOUR VIN

For 1981-86 the VIN plate is located on the Latch face of the left front door. The 1981-86 VIN number has 17 digits and identifies the World Manufacturer Identifier Numerical Sequence of Assembly.

KEY INFORMATION 1981-86

1981: For 1981 trucks, no exterior styling changes were made. In January 1981, an all-new compact size Ranger entered production. Production totals: F100's - 170,835, F150's - 210,475, F250's - 71,884, and F350's - 37,120.

1982: In 1982, the Ford name was removed from the face of the hood and replaced by the Ford Oval that was centered in the rectangular slots of the grille. Production totals: F100's - 108,096, F150's - 183,606, F250's - 69,482, and F350's - 28,805.

1983: For 1983, styling was the same as in 1982. Standard features included chrome bumpers and bright door mounted mirrors. In 1983, Ford regained its traditional first place spot in sales from Chevrolet as its F-Series models became America's most popular vehicle of any type. Production totals: F100's - 75,191, F150's - 192,704, F250's - 94,844, and F350's 34,241.

1984: Styling for 1984 was carried over from 1983. The F-150 became Ford's base light duty truck. Production totals: F150's - 350,501, F250's - 138,198, and F350's - 40,187.

1985: For 1985, basic styling was unchanged. Optional body side moldings now started below the front side-marker lights. Standard features included Twin-I-Beam IFS (4X4's had Twin-Traction Beam IFS). Production totals: F150's - 348,565, F250's - 151,619, and F350's - 57,088.

1986: The F-250 was only offered with the 8 foot Styleside box. F-Series convenience options included carpeted lower door panels with map pockets and a soft wrapped steering wheel with wood-tone insert. Production totals: F150's - 360,698, F250's - 154,778, and F350's - 75,920.

1987-96

YEAR KEY INFORMATION

1987 Ford introduced smoother more aerodynamic body styling. New aerodynamic impact resistant headlights with easy to install halogen bulbs replaced the old inset sealed beam style. The interior was also redesigned to a more streamlined appearance. Standard equipment now included rear wheel antilock braking systems, power steering and power brakes. The 4.9L and 5.0L Engines now had

Electronic Fuel Injection and serpentine drive belts. The F250 was given heavier duty front and rear suspension, and included 16 inch 8 lug wheels for an increased GVW rating.

1988 Electronic Fuel Injection and serpentine drive belts became standard for all gas engines. The Flareside bed was dropped. Manual transmissions were now five speed and the heavy-duty 5 speed is now standard in the F250.

1989 Basic styling was unchanged for 1989. The four speed transmission was brought back as an option.

1990 An all new Heavy-duty E40D electronically controlled 4-speed automatic transmission was offered with the 5.8L engine and was later available with the 4.9L and 5.0L.

1991 Basic styling was unchanged for 1991. An all black "Night" model was also offered for the F150 with aluminum deep dish wheels and a handling package.

1992 A 75th Anniversary F150 was offered. The Flareside was brought back on the sport chassis only. The front and cab of the Truck were restyled, most noticeably to the grille. The grille was redesigned with park and turn signal lamps now fully under the headlamps and wrapped around the side. Two vertical bars on the grille replaced the three bar style used since 1982.

1993 The F150 Lightning was introduced mid year with a 240hp 5.8L engine. The "Custom" trim packages were dropped as the base model and replaced by the XL. The "Night" model and the 4.9L engine were no longer available and the transfer case became the New Process 200.

1994 Driver side airbag, side door guard beams and stainless steel exhaust were added as standard equipment.

1995 A new Eddie Bauer trim level was added to the F150. This was also the last year for the F150 Lightning series.

1996 No significant changes were made for the F-Series this year as Ford began tooling for the redesigned 1997 models.

BLUE OVAL TRUCK PARTS

NOTES

A - This is the best kit we have seen for converting your straight axle pickup to power steering. The kit comes with a modified rebuilt Toyota 4X4 power steering box, a steering u-joint for the box, mounting brackets, hardware, and a custom pitman arm to fit the stock drag link.

B - A floor mount and column drop are required with this unit. Please see CU-0108 and CU-0109.

C - This is truly a bolt-on conversion kit. Bolt up a Chrysler rotor and GM caliper to the stock Ford spindles. Kit includes caliper mounts, inner & outer bearings, seals & hardware, rotors, calipers, and braided stainless hoses.

D - Our booster kits will help your vehicle stop better than ever! These bolt on kits mount to the original master cylinder frame bracket and use the factory pedal assembly. Available in 2 and 4 wheel disc applications and drum brake applications. Kits include: power brake booster, mounting bracket, master cylinder, prop valve (disc only), prop valve bracket, prop valve lines and hardware. Note: transmission cross member may need to be replaced. Specify Drum, Disc/Drum or Disc/Disc

E - Dolphin Power Window Kit With Switches Illuminated & Cross Over Wiring Kit. Power window kit will work for all windows with flat glass only that go straight up and down and that are between 6" and 24". This kit for 2 doors.

F - Our booster kits will help your vehicle stop better than ever! These bolt on kits mount to the original master cylinder frame bracket and use the factory pedal assembly. Available in 2 and 4 wheel disc applications and drum brake applications. Kits include:

power brake booster, mounting bracket, master cylinder, prop valve (disc only), prop valve bracket, prop valve lines and hardware. Note: transmission cross member may need to be replaced. Specify Drum, Disc/Drum or Disc/Disc

G - Used with CU-0009 and CU-0010

H - This is truly a bolt-on conversion kit. Bolt up a Chrysler rotor and GM caliper to the stock Ford spindles. Kit includes caliper mounts, inner & outer bearings, seals & hardware, rotors, calipers, and braided stainless hoses.

I - Our booster kits will help your vehicle stop better than ever! These bolt on kits mount to the original master cylinder frame bracket and use the factory pedal assembly. Available in 2 and 4 wheel disc applications and drum brake applications. Kits include: power brake booster, mounting bracket, master cylinder, prop valve (disc only), prop valve bracket, prop valve lines and hardware. Note: transmission cross member may need to be replaced. Specify Drum, Disc/Drum or Disc/Disc

J - Includes: Power booster (new with brackets and pedal linkage), master cylinder (new power brake master), combination valve (disc/drum with bracket and lines), spindles (supplied with disc parts pre assembled onto spindles), calipers (new single piston with metallic pads), rotors (new domestic made 12" with 5 X 5 1/2" bolt pattern), bearings, seal, hoses (new top quality 15" rubber hose), and rotor dust caps. Requires use of 15" wheels. Minimum shipping of \$85.00.

K - Includes: Master cylinder (new manual brake master), combination valve (disc/drum with bracket and lines), spindles (supplied with disc parts pre assembled onto spindles), calipers (new single piston with metallic pads), rotors (new domestic made 12" with 5 X 5 1/2" bolt pattern), bearings, seal, hoses (new top quality 15" rubber hose), and rotor dust caps. Requires use of 15" wheels. Minimum shipping of \$85.00.

L - This is truly a bolt-on conversion kit. Bolt up a Chrysler rotor and GM caliper to the stock Ford spindles. Kit includes caliper mounts, inner & outer bearings, seals & hardware, rotors, calipers, and braided stainless hoses.

M - Requires the purchase of a new rag joint - 3/4 36 X 3/4 36.

N - Fits between bed strips without having to cut.

O - Panel dimensions: 4 3/8" round. Please indicate type of gauges: Nordskog, Classic Instruments or Dolphin.

P - Panel dimensions: 4 3/8" round. Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

Q - Panel dimensions: 12 3/4" X 5 1/2". Please indicate type of gauges: Nordskog, Classic Instruments or Dolphin.

R - Panel dimensions: 12 3/4" X 5 1/2". Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, or Dolphin.

S - Panel dimensions: 12 3/4" X 5 1/2". Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

T - Panel dimensions: 12 3/4" X 5 1/2". Please indicate type of gauges: Nordskog, Auto Meter or VDO.

U - Panel Dimensions: Stock. Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

V - Panel Dimensions: Stock. Please indicate type of gauges: Nordskog, Auto Meter or VDO.

W - Panel Dimensions: Stock. Please indicate type of gauges: Nordskog, Classic Instruments or Dolphin.

X - Panel dimensions: 4 1/2" X 18 1/2". Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

Y - Panel dimensions: 4 1/2" X 18 1/2". Please indicate type of gauges: Nordskog, Classic Instruments or Dolphin.

Z - Panel dimensions: Round. Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, or Dolphin.

AA - Panel dimensions: 24 1/2" X 4 1/4". Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

BB - Panel dimensions: 24 1/2" X 4 1/4". Please indicate type of gauges: Nordskog, Auto Meter, Classic Instruments, Dolphin, or VDO.

CC - Performance Digital Speedometer with one button calibration, 0-200 MPH, 0-60 time, 1/4 mile time, and top speed recall. The speedometer is compatible with most factory and aftermarket speed sensors. Water temperature with 100-300 degree (F) range (sender included). Oil pressure 1-100 psi (sender included). Voltmeter 8-18 volts (no sender required). Fuel level (works with most existing senders). Turn signal and High Beam indicator LEDs. Universal speed sensor included. Available in red, green, blue, or amber. Add \$25.00 for blue. Size is 11.25" X 3" X .75".

DD - Performance Digital Speedometer with one button calibration, 0-200 MPH, 0-60 time, 1/4 mile time, and top speed recall. The speedometer is compatible with most factory and aftermarket speed sensors. Water temperature with 100-300 degree (F) range (sender included). Oil pressure 1-100 psi (sender included). Voltmeter 8-18 volts (no sender required). Fuel level (works with most existing senders). Turn signal and High Beam indicator LEDs. Universal speed sensor included. 0-9900 RPM Tachometer in 100 RPM increments. Available in red, green, blue, or amber. Add \$25.00 for blue. Size is 13.75" X 3.25" X .75".

EE - Performance Digital Speedometer. Water temperature gauge 100-300 degree (F) (sender included). Fuel level 0-99% (works with most factory senders). Works with most electronic speed sensors. Oil warning light (sender included). High Beam, turn signal, and emergency brake lights. Bezel mounting requires minimal dash holes for wires. Available with or without polished aluminum bezel. Size with bezel is 6.75" diameter X 1". Available in red, green, blue, and amber. Add \$25.00 for blue.

FF - Set includes Speedometer, Oil PSI, Water Temp, Digital Voltmeter, Fuel Level, Oil PSI Sender, and Water Temp Sender. Add \$15.00 for turn lights and high beam indicators. New Gas Tank Sending Unit is required - add \$40.00. Digital display color choice of blue, amber, or green. Add \$25.00 for blue.

GG - Set includes Speedometer, Tachometer, Oil PSI, Water Temp, Digital Voltmeter, Fuel Level, Oil PSI Sender, and Water Temp Sender. Add \$15.00 for turn lights and high beam indicators. New Gas Tank Sending Unit is required - add \$40.00. Digital display color choice of blue, amber, or green. Add \$25.00 for blue.

HH - Billet dash insert w/ non glare satin finish. 2 1/16 inch gauges and 3 3/8 inch speedometer. Comes with turn and high beam indicator lights, mounting hardware, and instructions.

II - Billet dash insert w/ non glare satin finish. 2 1/16 inch gauges and 3 3/8 inch tach and speedometer. Comes with turn and high beam indicator lights, mounting hardware, and instructions.

JJ - 3 3/8" White w/ Silver Bezel and Red Pointer - includes fuel, oil, and temp sending units

KK - 3 3/8" Black w/ Silver Bezel and White Pointer - includes fuel, oil, and temp sending units

LL - Fits all dashes w/ light holes.

MM - Includes electric oil, fuel, water, and volt meter as well as all sending units.

NN - "Wiring kits use GXL 125 high temp cross linked polyethylene jacketed wire that is grease, oil, gas, and acid resistant. EACH WIRE IS LABELED EVERY 5" its entire length so checking a circuit is EZ! Think about it -- what good does pretty COLOR coded wire do when you're stuck on the side of the road with no coded diagram? And it's pretty hard to tell dark blue wire from black or brown by flashlight. EZ Wiring is the EZ way! Each circuit wire is labeled so you know exactly where it goes -- EZier to wire -- EZier to trouble shoot. Our best kit -- the EZ-21 - contains 18 fuses and 21 circuits including power windows, A/C and trunk light. No extra charge for GM factory column connectors and instrument wiring. Harness includes a pre-wired, 18 fuse, 21 circuit panel for GM columns: fuses, flashers, breaker, connectors and terminals, horn relay, headlight

plugs, loom and complete instructions and diagrams. EACH WIRE IS COLOR CODED AND LABELED, FOR E-Z INSTALLATION!"

OO-This custom tank is designed to fit between the frame rails of your truck behind the rear axles where the tank belongs. Tanks are fully baffled and compatible with EFI or carbureted applications.

PP - Fits behind rear crossmember. Will need to remove spare tire crossmember.

This item is oversized. Requires minimum shipping charge of \$30.00.

QQ - Complete One Piece Window Kits - channels, glass runs, glass and detailed instructions on how to install. Must be used with a power window kit. Please specify color: clear, tint (green), or smoked (gray) in notes section when ordering. This item is oversized. Requires minimum shipping of \$40.00.

RR - The Highliner replaces or adds a dynamic custom headliner to your standard cab pick-up truck turning the cab into a music center featuring breathtaking sound. The Highliner is manufactured out of high impact, leather grained, black ABS plastic and can be painted to match the interior of your truck. Add \$25.00 for any color other than black. The Highliner installs easily and includes four 4 inch air suspension speakers with a 5.8 ounce magnet, which will handle up to 10 watts of power. High temperature resistant voice coils for clean, crisp sound. Highliners come with foam speaker baffle and suppression pads, antenna extension cable, bezel plate, installation hardware, and complete instructions. This item is oversized and requires a minimum shipping charge of \$55.00.

SS -The Highliner replaces or adds a dynamic custom headliner to your standard cab pick-up truck turning the cab into a music center featuring breathtaking sound. The Highliner is manufactured out of high impact, leather grained, black ABS plastic and can be painted to match the interior of your truck. Add \$25.00 for any color other

than black. The Highliner installs easily and includes four 4 inch air suspension speakers with a 5.8 ounce magnet, which will handle up to 10 watts of power. High temperature resistant voice coils for clean, crisp sound. Highliners come with foam speaker baffle and suppression pads, antenna extension cable, bezel plate, installation hardware, and complete instructions. This item is oversized and requires a minimum shipping charge of \$55.00.

TT - Replace your old plastic with our aluminum dress up knob. These items are an inexpensive way to customize your interior without the need to empty your pocket book. Use with your Ford or Chevy steering column. Machine finished.

UU - Replace your old plastic with our aluminum dress up kits. These items are an inexpensive way to customize your interior without the need to empty your pocket book. Use with your Ford or Chevy steering column. Machine finished.

VV - Replace your old plastic with our aluminum dress up knobs. These items are an inexpensive way to customize your interior without the need to empty your pocket book. Machine finished.

WW - Replace your old plastic with our aluminum dress up kits. These items are an inexpensive way to customize your interior without the need to empty your pocket book. Use with your Ford or Chevy steering column. Machine finished.

CO-0087	Heater Cable Assembly - Air	85-86	F-Series	19.95	L

A - models w/ recirculating heater

B - models w/ fresh air heater

C - models w/ economy heater

D - models w/ deluxe heater

E - Fresh Air Type. Fits models before serial number U40,001.

F - 61-67 and 68-81 w/o air - Fresh Air Type

G - 65-66, 67-72 w/o AC, and 73-79 Fresh Air Type - 6H x 6W

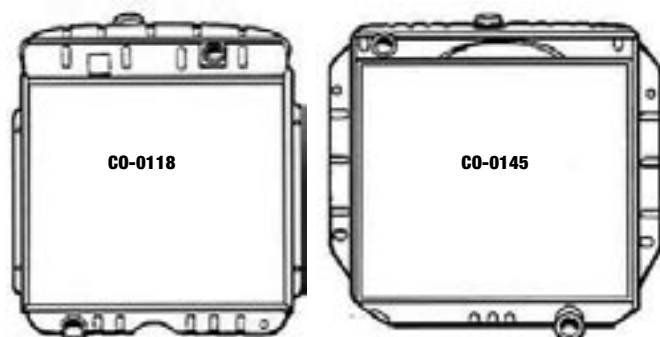

H - w/ factory air

I - Fresh Air Type

J - Fresh Air Type - 7-3/4H x 6W

K - Fresh Air Type. Fits models from serial number U40,001 and on

L - w/o factory air
